PATRICK'S POINTERS

- Color Type**
"Wearing your hair black requires semipermanent or permanent hair color. You need [the potency of] permanent hair color to switch from light brown or lighter hair to black hair."
- Root Management**
"Color the roots of your black hair every three to four weeks. I recommend using a semipermanent dye, which gives hair lots of shine but only lasts four weeks, in case you change your mind."
- Play It Safe**
"Dyes with harsh chemicals are not the only option if you want colorful tresses. Buy...dyes without ammonia or PPD. Not only can they damage your hair over time, but some [cause allergic reactions]."
- The Regimen**
"A great shampoo and conditioner are essential to the life of your colored hair."
—LACONIA J. DEAN
